Empathy Map

The empathy map helps understand the needs, challenges, and expectations of disaster management authorities who use the **Rising Waters: A Machine Learning Approach to Flood Prediction** system. By understanding what they **Say, Think, Do, and Feel** during flood monitoring and emergency response, the project aims to deliver an intelligent machine learning solution that provides timely flood risk predictions, supports informed decision-making, and enhances disaster preparedness to protect lives and property.

SAYS - We need accurate flood - Early warnings can save lives. - Reliable weather information is essential.	THINKS - Can this prediction be trusted? - How can we reduce flood damage? - We need faster decision-making.
PERSONA NAME <i>Disaster Management Officer</i>	
DOES - Monitors weather and rainfall data. - Issues flood alerts and evacuation notices. - Coordinates emergency response teams.	FEELS - Concerned about public safety. - Responsible for protecting lives and property. - Hopeful that technology can improve disaster preparedness.
