

Project Demo Planning

Date	05 July 2026
Team ID	XXXXXX
Project Name	Rising Waters
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction	Introduce the Rising Waters project, objectives, and the problem of flood prediction.	2	Jhashwanth
2	System Architecture	Explain the project architecture, technologies used (Flask, XGBoost, HTML, CSS, JavaScript), and workflow.	2	Jyothsna
3	Live Application Demonstration	Demonstrate the web application by entering weather and rainfall data and generating flood prediction results.	4	Harshitha
4	Machine Learning Model	Explain the dataset, preprocessing, StandardScaler, XGBoost model, and prediction process.	2	Jhashwanth
5	Testing & Results	Demonstrate Postman API testing and present prediction accuracy and application performance.	2	Jyothsna
6	Conclusion & Future Scope	Summarize the project, discuss future enhancements, and answer questions.	2	Harshitha

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the importance of flood prediction and the motivation behind developing the Rising Waters system.
2	Solution Overview	Describe the system architecture, technologies used, and how the machine learning model predicts flood risk.
3	Live Feature Demonstration	Show the web application, enter sample input values, and demonstrate both High Flood Risk and Low Flood Risk prediction results. Also demonstrate Postman API testing if required.
4	Q&A Session	Answer questions about the dataset, XGBoost model, Flask implementation, testing process, and future improvements.
